

## Elegant, Finishing Touches

The DeckLites system is low voltage, energy efficient and helps put the refining touch on any deck design. This chic lighting was designed with both safety and style in mind. Crafted to complement and enhance the brilliance of TimberTech and AZEK decks, the system is designed for use with all TimberTech and AZEK railing systems.

Post Cap Module

Generates a subtle, inviting glow around any TimberTech RadianceRail or RadianceRail Express Post Caps. Post Caps sold separately.

Accent Light

Produces a delicate downlight effect on Posts or between Balusters. Typically used at transition posts or near stairs for additional safety. Available in Architectural Bronze and White.

Riser Light

Gives off a soft light for added safety on steps or stairs. Available in Architectural Bronze.

In-Deck Light

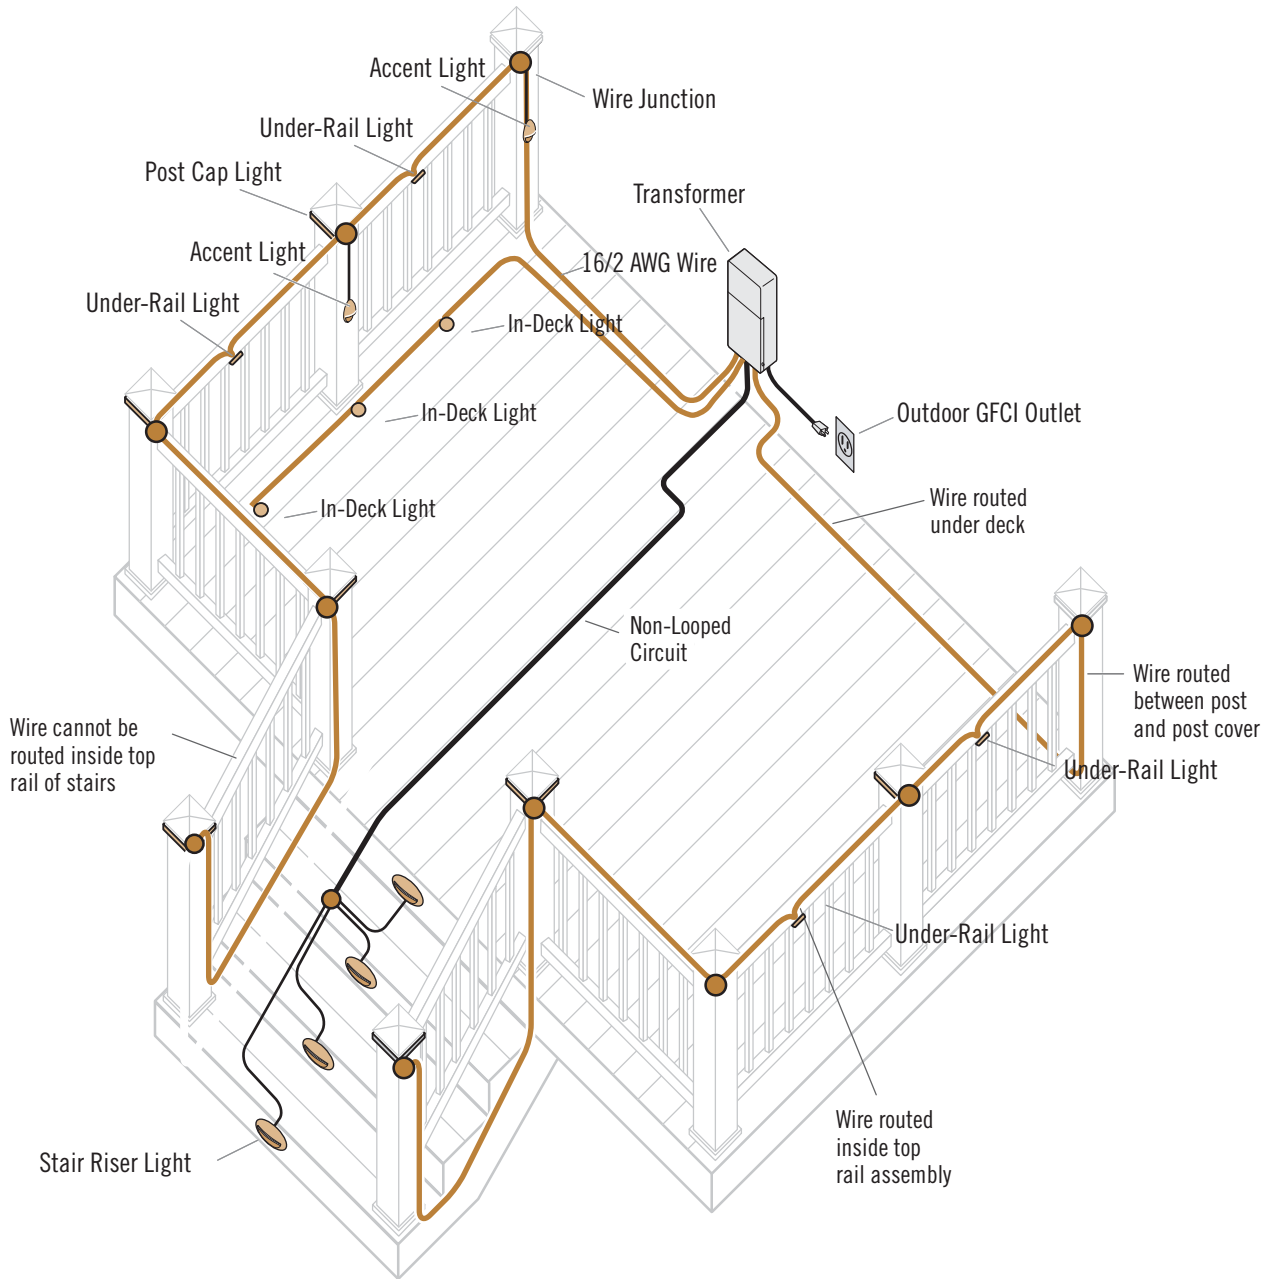

Mounts flush to produce an ambient glow on the deck surface. Available in Architectural Bronze.

Under-Rail Light

Produces a subtle downlight glow in between balusters. Light fixture hides in underside of the top rail.
